PROFILE

As a skilled and detail-oriented UI Developer, I possess expertise in HTML, CSS, and JavaScript, with a strong focus on building interactive and responsive websites. My proficiency extends to ReactJS, Git/GitHub, command line usage, and the VS Code editor. Backed by a UI Development certificate, I have a solid foundation in UI and UX principles, including color theory. With a keen eye for design and a commitment to creating user-friendly interfaces, I bring a valuable combination of technical skills and design sensibilities to deliver engaging web experiences.

PROJECTS

Food Menu

- Developed a dynamic food menu application using React components and state management.
- Implemented filtering functionality to allow users to easily find and view specific categories of food items.

Accordion Sidebar

- Built a React app featuring an accordion-style sidebar with expandable content sections.
- Employed React hooks to manage the state of each section, providing a clean and intuitive user interface.
- Live Site :-** <https://faq-accordion-puce-three.vercel.app/>

Tab component

- Created a React app with a tabbed interface that dynamically displays content based on user-selected tabs.
- Used React hooks to manage the active tab state and ensure efficient rendering.
- Live Site:-** <https://tab-component-sable.vercel.app/>

Currency Converter

- Implemented functionality to fetch real-time exchange rates from a reliable API, providing users with accurate and up-to-date conversion information.
- Utilized React state management to ensure a responsive and seamless user experience.
- Live Site :-** <https://currency-converter-khaki-psi.vercel.app/>

Tic-Tac-Toe

- Developed a Tic Tac Toe game in React, showcasing expertise in project creation by referencing the official React documentation.
- Exhibited React development skills through an independently built Tic Tac Toe project, demonstrating self-guided proficiency with the official documentation.
